As part of the Dundee Grand Rounds, HIC Services and the Division of Population Health Sciences are hosting:

The 9th Mackenzie Lecture delivered this year by Professor Mark Caulfield on Thursday 15th May 2014 at 1.00pm

"Genomic Medicine — time for translation"

Mark Caulfield graduated in Medicine in 1984 from the London Hospital Medical College and trained in Clinical Pharmacology at St Bartholomew’s Hospital where he developed a research programme in molecular genetics of hypertension and clinical research. In 2009 he won the Lily Prize of the British Pharmacology Society. In 2000 he established the Barts and The London Genome Centre which now underpins over 40 programmes of research. Since 2008 he directs the Barts National Institute for Health Research Cardiovascular Biomedical Research Unit. He was appointed Director of William Harvey Research Institute in 2002 and was elected a Fellow of the Academy of Medical Sciences in 2008 and was President of the British Hypertension Society (2009-2011). He led on fundraising towards the £25m William Harvey Heart Centre which created a translational clinical research centre. He served on the NICE Guideline Group for hypertension and leads the Joint UK Societies’ Working Group and Consensus on Renal Denervation. He is an NIHR Senior Investigator.

The Lecture will be held in the Gannochy Trust Lecture Theatre on Level 7 of Ninewells Hospital.

There will also be a HIC-hosted morning session in the flexible teaching room on level 7, in the Library area.

Further details can found at http://medicine.ac.uk/external-relations

Lunch will be available from 12.30pm at the Promenade Area on level 7, outside the Lecture Theatre. For catering purposes, please email y.gormley@dundee.ac.uk to confirm.
